

## **FREEZE 2021—Super Plants, Virtually UNTOUCHED by Freeze!**

1983, 1989, 2021: If you've lived in Corpus Christi through all these DEEP freezes, you may want to replant with what we've discovered must be super-hardy plants, both at the Botanical Gardens, or at homes of staff. These show no, or miniscule signs of multiple days in the teens and 20s—without even being covered. We think you'll be able to take care of your pipes, your animals and yourselves, without worrying about losing these plants!

### **SUPER PLANTS**

Agarita

Agave Parviflora

Chives
